HCS to Convene Facilities Planning Study Committee

Hancock, New York December, 2013-

The Hancock Central School District, working in concert with our professional architects, Highlands Associates, PC, will be convening a district wide study team for the purposes of assessing and evaluating potential facilities upgrades, maintenance, and renovations. The committee will be comprised of school board members, architects, administrators, teachers, students, staff, and community members.

We are seeking community volunteers to serve. Please contact Sharon Drumm, (607) 637-1301 or sdrumm@hancock.stier.org, if you are interested. Community membership will be limited to 3 to 5 volunteers.

The first meeting will be scheduled in February of 2014. The committee will meet one to two times per month until a final recommendation is made to the board of education.
